

# 5 MAJOR COMPONENTS FOR SAFETY COMPLIANCE

## STEP 1

Develop a company specific written safety and health management system

## STEP 2

Attend Professional initial safety training on the program covering all worker hazards identified

## STEP 3

Provide continuous specific hazard training to raise the worker's awareness

## STEP 4

Conduct continuous worker site safety evaluations and provide abatement for unsafe findings

## STEP 5

Run a reward and reprimand program to encourage employee participation

A Safety and Health Management System is your company's written commitment to a plan of action in the prevention of injuries and occupational diseases.

Work site Safety Evaluations must document the following corrective actions:

- The evaluator's findings of safe and unsafe work practices on the work site.
- Abatement (correction) made to each unsafe finding
- Safety Meeting Attendance Sheet
- Hazard training topic as part of the abatement process

## OSHA Penalty Structure

Serious	\$12,675 per violation
Failure to Abate	\$12,675 per day
Willful or Repeated	\$126,749 per violation
