

FLEET MANAGEMENT SAFETY

At Pike Consulting Group, we take the approach of identifying costly issues and listening to your organizational needs to provide our partners a best-in-class custom solution.

Today's business landscape requires companies to maintain insurance to remain in operation. Commercial Fleet vehicle insurance is essential and has become a large burden for companies to maintain. Vehicle accidents and costly lawsuits can result in unaffordable premiums and sometimes disqualifies companies for coverage altogether.

Our Fleet Management System is designed around your company's specific needs. We analyze your current situation to determine the best solution for your goals. Our Best-In-Class programs give management and drivers the knowledge, understanding, motivation, and accountability to maintain a measurable and realistic standard.

Pike Consulting Group was formed by Mitchell Smith and Gary DeGeorge Sr. in 2010. Pike has headquarters in Atlanta, GA with 26 associates serving 300+ customers in 11 states.

Pike offers customized products and services to manage Environmental, Health, Safety & Fleet Management Systems Nationwide with a focus area in Southeast, Southwest, Midwest, and East Coast regions. Pike uses a combination of industry leading programs coupled with hands-on training and mentoring in order to create a strong behavior-based safety culture that is sustainable long term.

To better serve customers, Pike Consulting Group has both a Construction Division and an Industrial Division with an integrated network of:

6 | OSHA Authorized General Industry & Construction Trainers

2 | National Safety Council Certified Defensive Driving Instructors

20
